## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 6 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Takagi et al. (US 6,504,919).

Regarding claims 1, 2 and 6, Takagi discloses, in Fig. 9, a communications method of performing communications by switching over a plurality of communication modes (V34 mode and G3 short communication mode), comprising:

measuring a communication performance based on each of the communication modes under a plurality of communication conditions (step 803) (column 10, lines 46-49).

obtaining a condition-based optimum communication mode in which the communication performance in the specific communication mode exceeds a communication performance in other communication mode per communication condition (step 804) (column 10, lines 50-54);

selecting the condition-based optimum communication mode in accordance with the communication condition when in communications, and thus performing the communications (steps 805-807) (column 10, lines 55-67).

Regarding claim 8, Takagi discloses a communications device further comprising;

Art Unit: 2662

means for storing the condition-based optimum communication mode (column 4, lines 55-67),

wherein the performance measuring module measures the communication performance in the communications with the other communications device if not stored with the condition-based optimum communication mode in the communications with other communications device when performing the communications with the other communications device (column 7, lines 12-56), and

the optimum mode-obtaining module obtains the condition-based optimum communication mode (column 10, lines 46-67).

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Parker (US 6,603,755) discloses a method and computer program products that can facilitate the selection of a communication service provided in a multiple communications mode environment.

Otani (US 5,367,522) discloses a multimedia communicating apparatus.
